ANY one who has had much to do with the classical teaching of young boys, must have been struck by the startling ignorance of the most ordinary Greek words displayed even by those who have a fair Latin vocabulary. As in many examinations boys are now expected to translate Greek without the help of a lexicon, it seems desirable that they should commit to memory daily a small number of the Greek words in more general use.

To supply these in classified lists is the object of this little book, the main idea and system of which has been borrowed from the excellent 'Latin Vocabulary for Young Boys,' by the Rev. C. Darnell, M.A., Headmaster of Cargilfield Preparatory School, with whose sanction and co-operation this work has been undertaken.
